ICAMAS 2026

Paper Presentation Tentative Schedule (10th - 12th March 2026)

VENUE: STATE BANQUET HALL ITANAGAR

			OFFLINE		ONLINE					
10th March 2026		Time	Paper ID	Title of paper	Paper ID	Title of paper (Google Meet joining info Video call link: https://meet.google.com/nzc-yhpv-fou Or dial: (US) +1 315-925-6276 PIN: 919 703 030#)	Paper ID	Title of paper (Google Meet joining info Video call link: https://meet.google.com/jwj-fsvt-orb Or dial: (US) +1 240-532-3716 PIN: 791 620 316#)	Paper ID	Title of paper (Google Meet joining info Video call link: https://meet.google.com/zih-eiwn-btz Or dial: (US) +1 573-375-5086 PIN: 826 241 685#)
	Oral Presentation 1	12:10 PM-12:20 PM	73	Experimental estimation of thermal conductivity of flexible composite thermal protection system at elevated temperature	42	Closed-Form Solution for Thermo-Elastic Responses of Radially Graded Spherical Pressure Vessels	22	Structural Optimization of CF-Nylon Honeycomb Sandwich Panel Composite for Aircraft Flooring	4	A Circular Economy Approach to Recycling Tire Waste into Sustainable Bricks
		12:20 PM-12:30 PM	155	A Mitigation Strategy for Spatiotemporal Atmospheric Model Variability in Gaganyaan Barometric Altitude Estimation	50	Learning Rate Sensitivity Analysis in ANN-Based Thermal Performance Prediction of Heat Sinks	23	Integrated Design and Modelling of Plumbing Network System with Water–Saving Approaches	11	Numerical Analysis and Optimization of Different Process Parameters in AZ31B Magnesium Plates During Friction Stir Welding Process
		12:30 PM-12:40	126	Experimental Investigation of a Double Slope Solar Still Integrated with	56	Numerical Investigation of Dual Wavy-Strut Scramjet Combustion	24	Aerodynamic Optimization of MAV Airfoils at Low Reynolds	27	Performance Evaluation of Friction Material from Crop Residue

		PM		Bitumen-Gravel Mix Sensible Heat Storage		with Transverse Hydrogen Injection		Number		
		12:40 PM-12:50 PM	206	Verification of Thermal dissipation performance of Liquid-cooled cold plates using ANSYS Fluent	58	Numerical Investigation of Dual Wavy-Strut Scramjet	26	On the Computational Characterization of Thrust and Efficiency in Two-Dimensional Flapping Optimized Airfoils	59	Enhancing Manufacturing Processes in Industry 5.0 Using ML & CPS
		12:50 PM-01:00 PM	464	Experimental Investigation of Single and Double-Pass Solar Thermal Collectors for Space Heating Applications	77	Exergy Efficiency Prediction of Solar Evacuated Tube Air Collector with Pierced Twisted Tape Using ANN	29	Failure Mode Driven Test Methodology for Military Aero Gas Turbine Engines	72	Experimental Investigations of Wear Characteristics of E-Glass/Epoxy Nanoclay Composite Materials
	Oral Presentation 2	02:40 PM - 02:50 PM	98	Design and Development of Antenna Calibration Fixture for Near Field Test Range	80	IoT-Enabled Prototype for Real-Time Monitoring of Double-Tube Heat Exchangers	32	Optimization of Pintle Geometry Affecting Performance of Expansion-Deflection Bell Nozzle Using CFD	82	AI-Based Predictive Maintenance of CNC Milling Machines Using Fuzzy Logic: A Theoretical Approach
		02:50 PM - 03:00 PM	241	Investigation of Fatigue Fracture in Brittle Materials Using Phase Field	85	Numerical Approach to Investigate Influence of Roof Slope on Thermal Behaviour of Building	33	Numerical Analysis of Geometric Configuration on Rocket Conical & Bell Nozzle	83	Advanced Surface Engineering for FRP-Al7075 Hybrid Joints (Review)
		03:00 PM -	242	Design & Analysis of Bench Level Testing Fixture for Electronic Modules.	88	Aging Induced Changes in Flame Height, Stability, and Structure of Ethanol	39	Computational Analysis of the Shape Optimization of the Ishii	86	Optimization & Comparative Analysis of Injection-Moulded vs 3D-Printed PA6

ICAMAS 2026

Paper Presentation Tentative Schedule (10th - 12th March 2026)

		03:10 PM				Gel Fuels		Aerofoil		
		03:10 PM - 03:20 PM	392	A Multi-Model Probability of Detection Framework Based on Electromechanical Impedance (EMI) Analysis for Characterizing Bond Degradation Using Non-Bonded PZT Configurations	90	Optimization of Helical Tube Geometry for Laminar Flow in Diesel Exhaust Fluid Transport	43	Synthesis and Characterization of Magnetorheological Fluid for Vibration Attenuation in Automobiles Using MR Dampers	96	Tailoring Shear Performance of Single Lap Composite Joints Using Graphene Nanoparticles Infused Adhesives
		03:20 PM - 03:30 PM	463	ANALYTICAL VERIFICATION OF ANTENNA CABIN STRUCTURE SUBJECTED TO WIND LOADING	97	Optimization and Performance Analysis of Swirl and Shear Coaxial Injectors Using Computational Investigations	47	A Novel Aluminum-Rubber-Coconut Fibre Composite: A Theoretical Assessment	99	Parametric Investigation of Surface Finish in Sustainable High-Speed Dry Machining
11th March 2026	Oral Presentation 3	09:00 AM - 09:10 AM	462	Study of Fiber Characteristics During Injection Moulding of Natural Fiber-Reinforced Sustainable Composites	115	Mass Flux–Based Ignition Criterion for Combustion Near Flammability Limits	48	Experimental Development of a Hybrid Epoxy Composite Reinforced with Aluminum, Rubber and Coir Fiber	108	Shear Strength Analysis of Self-Healing CFRP and GFRP
		09:10	181	Comparison of Tribological Behavior of	130	The Study of Bile Behavior as a Non-	52	Probabilistic Insights into Low-Velocity	109	Experimental Investigation of Thrust

		AM - 09:20 AM		Banana Fiber Reinforced GFRP and Banana Fiber Reinforced CFRP Composites under varying load”		Newtonian Fluid in the Cystic Duct Using Analytical Method and Computational Techniques with Axially Varying Viscosity		Impact of Nitinol Reinforced Graphite/Epoxy Composites		Force in Drilling E-Glass Epoxy Hybrid Composites Reinforced with Areca Fiber
		09:20 AM - 09:30 AM	248	Effects of carbon nanotubes (CNTs) on mechanical properties and damage sensing response of CFRP composites	143	Theoretical and Experimental Investigation of Detonation Characteristics in Stoichiometric Acetylene-Oxygen Mixtures	75	Influence of Blade Count on Structural & Modal Behaviour of Savonius Rotor	113	Experimental Study on Flame-Retardant Composites for Aircraft Flooring
		09:30 AM - 09:40 AM	166	Structural, Optical, Electrical and Photocatalytic Characteristics of 3d Transition Metals doped TiO2	144	Computational Assessment of Porous Media as Effective Thermal Performance Enhancers (TPMs) in Compact Heat Exchangers and Synergistic Effects of Graphene Nanoplatelets and Ionic Surfactants on	76	Analysis of Composite Laminates through Computational Design Using MATLAB for Aerospace Applications	116	Evaluation of Natural Fibre Composites Through Hybridisation

						Critical Heat Flux and Droplet Dynamics in Two-Phase Spray Cooling				
		09:40 AM - 09:50 AM	422	Influence of EDCLG Texturing on Surface Roughness and Material Ratio of Axisymmetric Thin-Walled Cylindrical Sleeves	162	Feasibility of Alternate Fuels in Transportation for Environmentally Friendly and Sustainable Future	78	Experimental Analysis of a 555-Timer–Based Metal Detector Using Differential Coil Geometry and Frequency Response	133	Experimental Investigation of Progressive Hybridization Effects on Mechanical and Tribological Properties of Stir-Cast AA6063/SiC/Gr/Marble Dust/Rice Husk Ash Composites
	Oral Presentation 4	02:40 PM - 02:50 PM	67	Topology-Driven Contact Pressure Optimization for Squeal Noise Mitigation in S-Cam Drum Brake Shoes using FEA	168	ANN Driven Configuration Optimization of Array of Circular Jets Impingement Heat Transfer	91	Design Optimization of CubeSat Payload Structure for Enhanced Radiation Shielding Under LEO Thermal Conditions	171	Analysis of Mechanical and Tribological Properties of Al7076 Alloy Composites with Graphite and SiC Reinforcements Using ANN and Random Forest Models
		02:50 PM - 03:00 PM	68	Understanding Damping Requirements for Mitigating Brake Squeal on “S” cam drum brake.	199	Experimental Study of DDT in Acetylene Mixtures under Confined Conditions	94	A Design of Experiments (DoE) Approach to Frequency Tuning in a Membrane-Based	179	Modelling & Analysis of Barrelling Effect in Cold Upset Forging

								Voice Prosthesis		
		03:00 PM - 03:10 PM	302	Simulation of High-Velocity Impact on Heterogeneous Material Systems Using a Total Lagrangian Material Point Method	200	Energy and Exergy Analysis of a Compression Ignition Engine Powered by Waste Cooking Oil Methyl Ester	114	A Low-Fidelity Framework for Optimizing Earth-Mercury Transfers Using Multiple Gravity Assists and Tisserand Graphical Search	227	Study on Mechanical, Tribological, and Microstructural Characteristics of a Graphite Nanoparticle Reinforced Stir-Cast Al6063 Composite
		03:10 PM - 03:20 PM	197	Detection of Impact Damage in Composite Materials Using Deep Learning Techniques	201	Effect of Tube Cross Section and Baffle on Heat Transfer Rate of Shell and Tube Heat Exchanger Using Finite Volume Method	118	Surrogate-Based Dynamic Response Prediction and Optimization of Helicopter Armament Booms	229	Circular Supply Chain Practices and Sustainability Performance in Manufacturing Systems: Evidence from Arunachal Pradesh
		03:20 PM - 03:30 PM	408	A computational Study of Sound Propagation through Labyrinth Panels	205	Supplement of Hydrogen with Waste Cooking Based Biodiesel for Diesel Engine	119	Stiffness Analysis of Rear BIW Joint Using Foam and Ribbed Insert Reinforcements	238	Unveiling the Impact of In-Process Cooling on Microstructure, HAGBs, Texture, Mechanical Properties & Correlated with Corrosion Resistance of Friction Stir Welded Al-Zn-Mg-Cu (AA7075) Alloy

ICAMAS 2026

Paper Presentation Tentative Schedule (10th - 12th March 2026)

	Oral Presentation 5	04:40 PM - 04:50 PM	93	Thermo-structural Qualification of Airborne composite Radome	211	Numerical Investigation on the Effect of Dual Strut Injection on Shock Augmented Mixing in Supersonic Combustion Ramjet Engine	152	Development and Aerodynamic Characterisation of a Five-Hole Pressure Analyser for Data Acquisition in Subsonic and Supersonic Regimes	249	Vacuum & Non-Vacuum Assisted Fabrication Using Additive Manufacturing
		04:50 PM – 05:00 PM	138	Vibration Analysis during Dry Machining of Aerospace Grade Titanium Alloy	220	Assess the Performance Analysis of the Adsorbent for Post-Combustion CO_2 Capture in a CI Engine-Powered Genset	161	Design and Optimization of 8-Bar Linkage Mechanism for Truck Seat Suspension	293	Optimum Alloying Elements in AL-MMC for Maximum Response Using Taguchi Based TOPSIS
		05:00 PM – 05:10 PM	383	Influence of stacking sequence on the tensile property of flax/carbon and jute/carbon hybrid composites.	231	Comprehensive Study on Various Energy Harvesting Systems in Automobiles	163	Ascertainment of Appropriate Sample Size for the Ranking of Technical Institutes in a Region to Ensure More Sustainability	300	Comparative Study of Local Dry Underwater and Wet Gas Metal Arc Welding of Marine Grade Steel

		05:10 PM – 05:20 PM	465	Enhancing Thermal Uniformity in Radar Cold Plates through Passive Flow Redistribution: A Variable Channel Approach	284	An Experimental Study of Heat Transfer and Fluid Flow Performance of Hybrid Nanofluids in Automobile Cooling Systems	170	Study and Implementation of Efficient Supply Chain Management Practices in Sugar Industry	301	Fracture Toughness Evaluation for Ensuring Weld Quality and Structural Integrity in Marine-Grade HSLA Steel
		05:20 PM – 05:30 PM	167	Modeling Machining Forces and Shear Angle for Dry Hard Turning for AISI 4340 material with Al2O3 coated carbide insert	287	Influence of Dimensionless Parameters on Air-Core Vortex Formation during Liquid Draining	172	Biomechanical Design and Analysis of the Human Cubital Joint Using DNN and RNN Validation	304	Thermo-Mechanical Analysis of Residual Stress in SS316L Component Fabricated Using Robotic Wire Arc Additive Manufacturing
		ONLINE

ICAMAS 2026

Paper Presentation Tentative Schedule (10th - 12th March 2026)

12th March 2026	Oral Presentation 6	09:40 AM – 09:50 AM	394	Evaluation of Residual Stresses in Welding Using Machine Learning Techniques	303	CFD Based Thermo-Hydraulic Performance Evaluation of a Twisted-Fin Parabolic Trough Solar Collector	173	Identification of Dynamic Characteristics of Auto-Rickshaw Engine Mount	371	Influence of Lubrication Conditions on Accuracy, Sustainability and Productivity of Spur Gears Produced by Gear Hobbing Process
		09:50 AM – 10:00 AM	387	Deep Learning-Based Defect Detection and Reliability Prediction in VLSI Manufacturing Integrated with PLM Systems	313	Thermal Performance Evaluation of TiO_2–CuO Hybrid Nanofluids in Plate Heat Exchangers	180	Application-Oriented Design of Nano-Enhanced Form-Stable Soy Wax and Stearic Acid Based Phase Change Materials for Thermal Energy Storage	374	Multi Parameter Optimization of Wire EDM Performance Characteristics of Stainless Steel 202 Using Response Surface Methodology
		10:00 AM – 10:10 AM	421	Tool Wear Prediction Using Machine Learning	317	Numerical Investigation of Cu–Al Bimetallic Fins in PCM-Based Battery Thermal Management Systems	193	Early Bearing Fault Diagnosis in Rotating Machinery Using Machine Learning and 1D CNN Techniques	406	Fabrication and Analysis of Micro Pillar Fin through Wire Spark Discharge Process

		10:10 AM – 10:20 AM	522	Development and mechanical properties characterization of waste-based composite materials for sustainable engineering	324	Thermal and Fluid Flow Performance of Oxide-Based Nanofluids in an Automobile Cooling System Tube: An Experimental Investigation	195	Fault Diagnosis in Structural Elements Using a Statistical Method Based Fuzzy Logic System	414	Tribological Study of the Effect of Surface Texturing on FDM 3D Printed Plain PLA Bearing
		10:20 AM – 10:30 AM	305	Tribological and Performance-Emission Analysis of a Nahar Oil-Derived Green-Lubricant as a Sustainable Alternative to Mineral Engine Oil: An Experimental and Machine Learning–Based Predictive Modeling	346	In-situ High-Temperature Raman Spectroscopic Study of 10 mol% Yttria-Stabilized Zirconia	196	Structural Analysis & Experimental Validation of Engine Mount System for BAJA ATV	439	Effect of Nanoclay and Heat Treatment on Mechanical Performance of Sustainable Banana (Empty Fruit Bunch) Fiber Reinforced Composites
	Oral Presentation 7	11:40 AM – 11:50 AM	377	SELF-SUPERVISED CONTRASTIVE LEARNING FOR BEHAVIORAL BIOMETRIC AUTHENTICATION	362	Eco-Friendly Mini Biogas Producer for Clean Energy and Organic Waste Management	213	Modeling, Simulation and Performance Analysis of High Efficient Permanent Magnet Machine for	456	Integrated Deep Learning and Mechanical Characterization for Sustainable Machining of GFRP Laminates

								UAV Applications		
		11:50 AM – 12:00 NOON	239	Analytical and Numerical Analysis of Thrust Modulation in Morphing Solar Sail	396	Experimental Investigation of a Loop Heat Pipe for Low-Grade Waste Heat Recovery from Electronics and Industrial Processes	217	Dynamic Learning Cuckoo Search-Optimized ANFIS for Cooperative Mobile Robot Navigation in Dynamic Environments	478	Assessment on Metal Deposition of Al 5356 Alloy in Wire Arc Additive Manufacturing
		12:00 NOON – 12:10 PM	259	Experimental comparison of thermal performance of energy storage systems with paraffin wax and pebbles	409	Vibroacoustic Analysis of Auxetic Laminated Composites under Thermal Loading	223	Machine Learning-Based Investigation of Dynamic Response of Electrostatically Actuated Circular Plate	489	Development and Tribological Assessment of Novel Stir-Cast Al-7075 Hybrid Composite Reinforced with $SiC+MoS_2$ and ZrB_2+MoS_2
		12:10 PM – 12:20 PM	312	Effect of Micro/Nano-Structured Zn-Cu Surfaces Fabricated by Electrochemical Etching on Pool Boiling Heat Transfer	412	Comparative Experimental Study of Conventional and Insulation Optimized Tubular Solar Stills	225	Physics-Informed Multi-Dataset Learning for Remaining Life Prediction of Lithium-Ion Batteries	384	Numerical Analysis of Thermo-Mechanical Failures in Bi-Materials Using Gradient Damage Method

ICAMAS 2026

Paper Presentation Tentative Schedule (10th - 12th March 2026)

		12:20 PM – 12:30 PM	298	Prediction of Thermodynamic Parameters and Sustainability Indicators of a Biomass Fueled Natural Convection Dryer using Machine Learning	429	Numerical Investigation of Wake Control around a Circular Cylinder Using Upstream and Downstream Splitter Plates at Low Reynolds Number	234	Stochastic Reliability Assessment of Renewable-Dominated Microgrids Incorporating Battery Energy Storage Using Sequential Monte Carlo Simulation	399	Design of a Wearable Elbow Exoskeleton for Rehabilitation Applications
		12:30 PM – 12:40 PM	512	Experimental Investigation of Hydrogen-Assisted Livistona jenkinsiana Griff biodiesel in a CRDI engine	266	Effect of Twist angle variations on Heat Transfer through U-shaped Pipe with Circular-cut Twisted Tape Inserts	235	Rider's Shield: Rear Collision Warning System for Motorcycles	401	An Automated Smart Parking System Using Real-Time Monitoring
		12:40 PM – 12:50 PM	31	Synergistic effects of methanol fumigation and air preheating on the performance and emission characteristics of a Diesel engine	471	Performance and Emission Analysis of Ethanol–Biodiesel Blends Enhanced with Cerium Oxide Nanoparticles in a Diesel Engine	237	Propeller Shaft Emergency Braking System	418	Experimental Analysis of Force Resolution of Series Elastic Actuator for Force Control Application

		12:50 PM – 01:00 PM	250	Impact of nonlocal and temperature dependent properties on the medium containing cylindrical cavity under hyperbolic two temperature thermoelastic diffusion	487	Comparative Study of Heat Transfer and Entropy Generation in Straight and Wavy Microchannel Heat Sinks	243	Design and Analysis of Disc Brake Mounted on Propeller Shaft	419	Modeling and Simulation of UAV-Based Search and Rescue in Disaster Scenarios
	Oral Presentation 8	02:40 PM – 02:50 PM	164	Topology Optimization of Chassis Crossmember for Crash and Durability	515	Effect of Sinusoidal Base Wall of Isosceles Triangular Cavity on Natural Convention Heat Transfer: A Numerical Analysis and ANN Prediction	246	Ergonomic Design and Fabrication of Stair Climbing Trolley for Human Comfort	425	Performance Evaluation of a Soap Nut Based Natural Stain Remover Enhanced with Plant-Derived Protease and Hydrogen Peroxide Treatments
		02:50 PM – 03:00 PM	437	FCM Clustering-based ANFIS Framework for Safe and Efficient Humanoid Robot Navigation in Cluttered Terrains	308	Low-Cost Obstacle Detection Glasses for Visually Impaired Users	253	Mobility Transition Dynamics in Accelerating Electric Vehicle Adoption: Insights from a Multi-Level Perspective	428	Exploration of Periodic Orbits Around Triangular Points in the Circular Restricted Three-Body Problem – Part 1

		03:00 PM – 03:10 PM	518	Slip and convective effects on MHD hybrid nanofluid flow over a radiated extending surface: A sensitivity analysis of thermal transport	320	Numerical Investigation of Blast Resistance in RC Slabs with Auxetic-Shaped Reinforcement	257	Design and Development of a Hydrogen-Powered eVTOL	446	Analysis of Critical Success Factors for the Road Logistics in Sustainable Supply Chain in India Using ISM–MICMAC
		03:10 PM – 03:20 PM	271	Experimental Investigation of a Bi-Droplet Coalescence: The Trade-off Between Radial Spreading and Vertical Expansion Induced by Viscosity Contrast	344	Computational Investigation of Tensile Strength Variation in Human Bone from Various Age Groups	273	Transient Responses Due to Surface Point Loads in a Transversely Isotropic Solid Half-Space under Moore-Gibson-Thompson Theory	467	Automatic Radial Cam Profile Generation Using Application Program Interface with Creo Parametric CAD Software
		03:20 PM – 03:30 PM	58	Computational analysis of dual wavy- strut scramjet	364	Sustainable Waste Management in the Iron Mining Industry of Odisha: A System Dynamic Modelling Approach	281	Dynamic Characteristics of a Balanced Rotor-Bearing System with an Impeller Disc Mounted on Nonlinear Supports at the Ends	470	Design and Analysis of a Compact Dual-Band 4×4 MIMO Implantable Antenna for MICS and ISM Biomedical Applications
		03:30 PM –	407	A SELF-SUPERVISED GNN -TRANSFORMER FEDERATED FRAMEWORK FOR RANSOMWARE DETECTION IN CYBER-PHYSICAL ENERGY SYSTEMS						

ICAMAS 2026

Paper Presentation Tentative Schedule (10th - 12th March 2026)

		03:40 PM		
10th March 2026	POSTER PRESENTATION 1	04:40 PM - 06:00 PM	81	STRUCTURAL OPTIMIZATION OF ROCKET IGNITOR PRESSURE VESSEL
			87	Phase-Resolved Surface Characterization and Parametric Optimization of Hybrid Electrochemical Surface Grinding of Duplex Stainless Steel
			157	Computational Analysis of a Small-Scale UAV Propeller Using the MRF Approach.
			183	Optimization of Laser Beam Percussion Drilling of thick Al/SiC MMC Using RSM and Genetic Algorithm
			270	2.4m Parabolic composite reflector for Ku Band satellite communication
			207	Shock Wave Attenuation Using Architected Geometric Structures: A CEL-Based Numerical Investigation
			252	Development of a UAV for Vision-Based Fault Detection in Power Transmission Systems Using Deep Learning
			343	Experimental and Numerical Insights into Intermetallic Formation in Al 6061-T6/Cu-DHP Explosive Weld Interface
			484	Development of Non-Destructive Ultrasonic and Microwave Methods for Solid Propellant Regression-Rate Measurement
11th March 2026	POSTER PRESENTATION 2	11:40 AM - 01:00 PM	169	Computational Investigation of Nickel-Tetrazole Based Energetic Metal-Organic Coordination Systems for Propulsion Applications
			251	MOF-Enabled Modulation of Particle Size Distribution in High-Temperature Combustion Plumes
			263	Machine Learning Algorithm for Optimized Water Usage in Under-Truck Cleaning application of Military Vehicles

			264	Design and Development of an IR-Based Line-Follower Robot for Precision Under-Truck Cleaning of Army Vehicles
			279	Optimization of Laser Engraving Parameters for Continuous Micro texturing on Ti-6Al-4V
			322	Design and Development of a Dual-Function Robotic fingers for Clove Harvesting Application
			323	High-Precision Edge-AI Framework for Autonomous Clove Detection and 3D Cutting via YOLOv8 and RGB-D Fusion
			404	Fault detection in lithium-ion battery using Artificial Intelligence
			491	Energy generation through co-gasification of Sawdust and Sanitary wastes: An Aspen Plus modelling study
